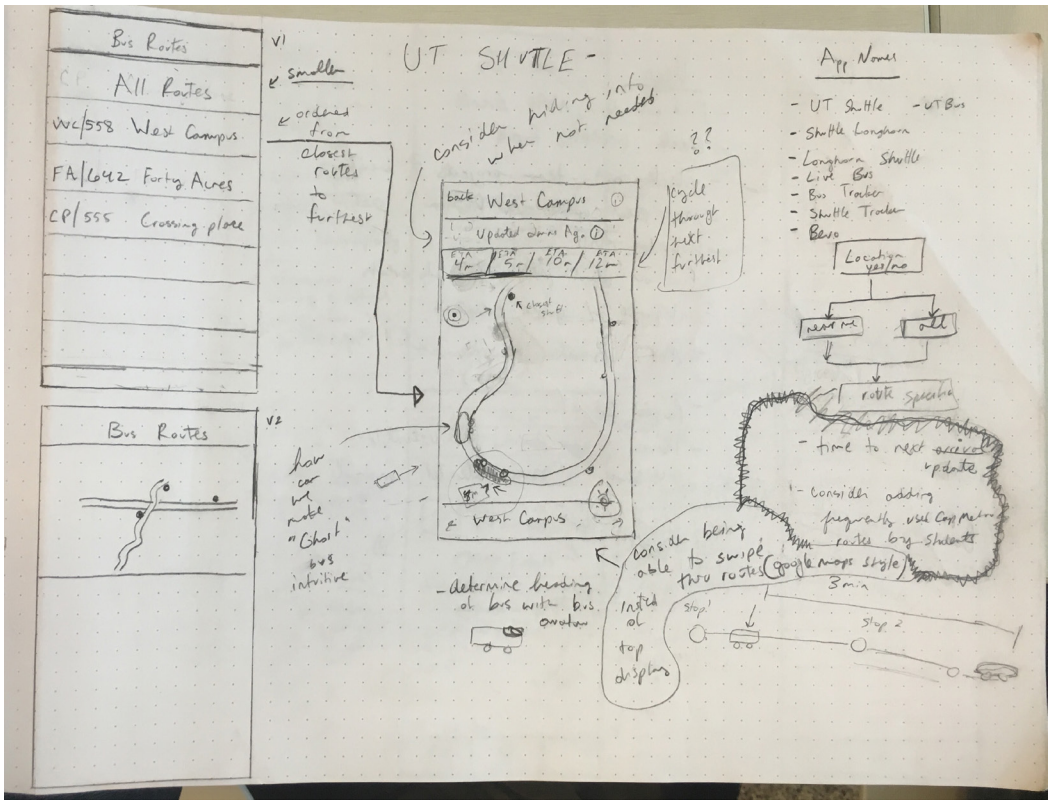
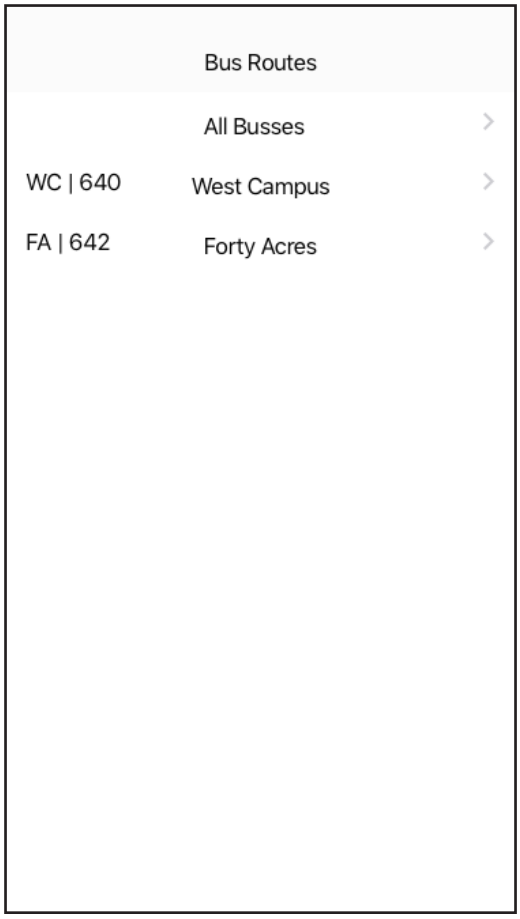
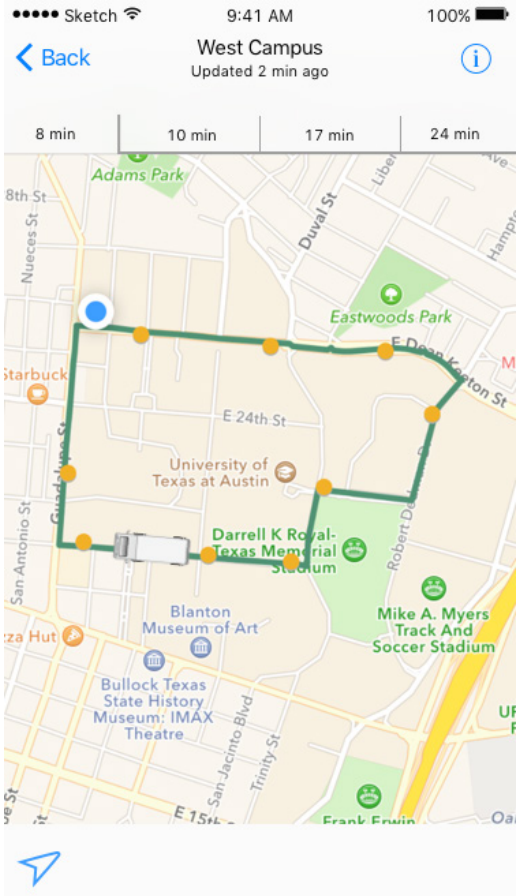
UI Sketch & Mockup

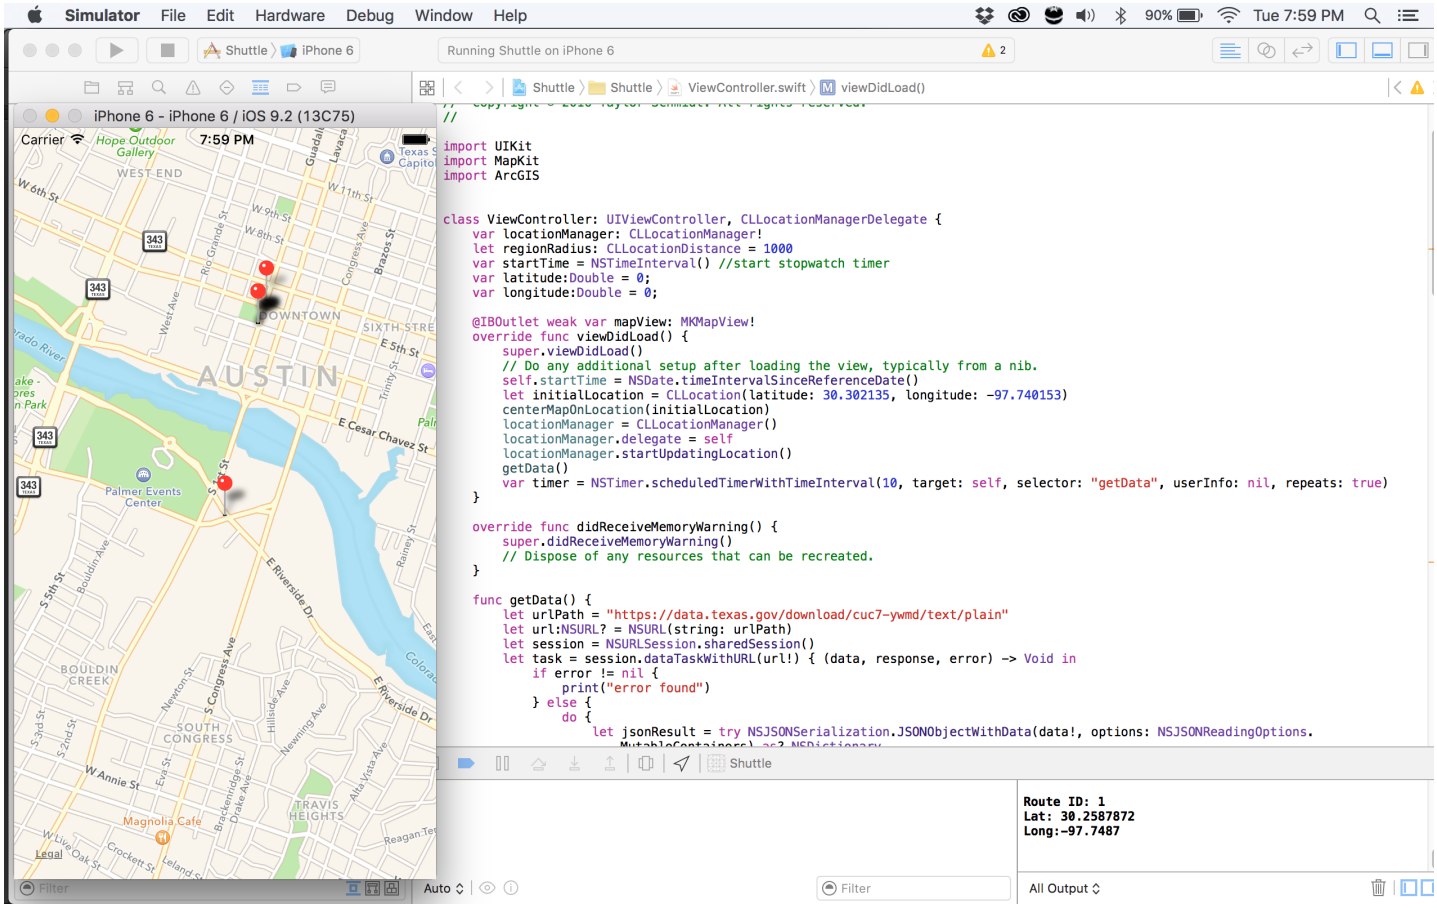






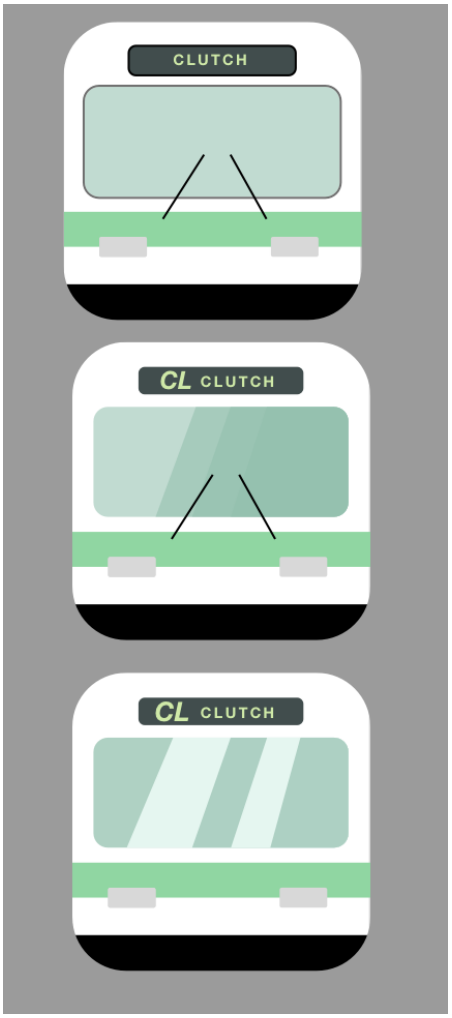
Xcode Proof of Concept

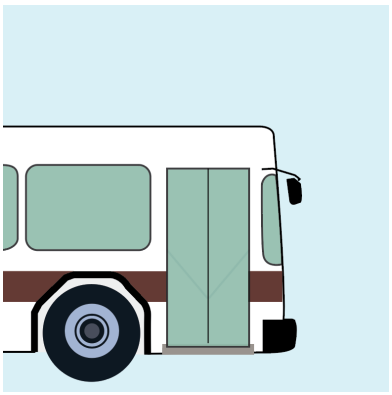
We have started developing the app and are using Captial Metro's bus update data to place a pin on the map. The red pins on this map show the path of the Route 1 as it updates live. This established that we would be able to display bus locations on an iOS app view.

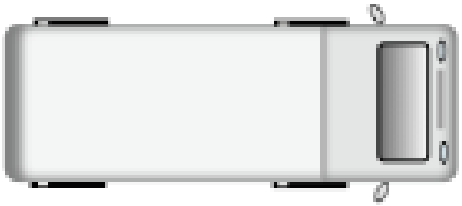


Logo Ideas & Assets

These logos were all inspired by features of the UT Shuttles, I wanted to represent the bus in a way that didn't show just a bus with wheels. With the logos on the left we are exploring versions of a final logo.







Bus asset for map
